

Bunny Roadmap

The roadmap of our planned features and future direction is as follows:

- Version 0.9.0 – released on December 15, 2020
 - First pre-release
 - You can compile a simple Haskell program and build an Android app.
- Version 0.9.x
 - Bug fixes and feature additions for Version 1.0.0.
 - Give priority to stability, and performance improvement will be postponed basically.
 - Introduce Semantic Versioning
 - Establish a policy for issue tracking and repository management
- Version 1.0.0 (scheduled for release in May 2021)
 - Meet all Haskell 2010 specifications
 - Support FFI and allow Java classes and methods to be used in Haskell programs
 - Implement a more decent terminal emulator.
- Version 2.0.0 (undecided)
 - Increase speed (change STG execution method)
